2/2

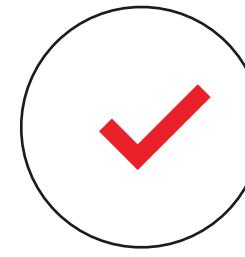

Integration with Google, Microsoft Authentication

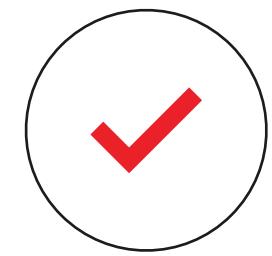

Desktop, iOS and Android

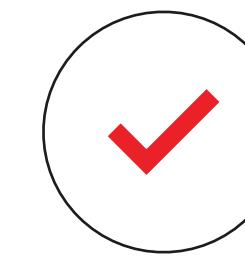

5 Step Compliance Process to follow

Continuous improvement with new features released regularly.

Pre-filled Linfox jotforms using the app data to reduce errors and reduce driver effort

Driver performance scores sent to Drivers & Contractors

saphyro.

Fleet Features

1/2

Dashboard with amber and red warning flags to highlight potential issues

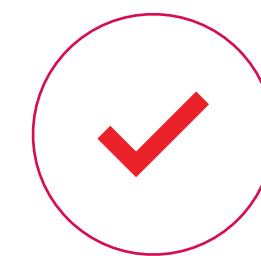

Service history

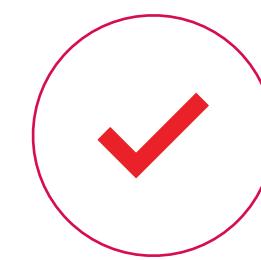

Odo history includes events from CSA app

Geo-stamp history

Full Inspections including regular Tyre inspections

Gaps highlighted compared to Linfox view

saphyros

Fleet Features

2/2

Tyre history and rules

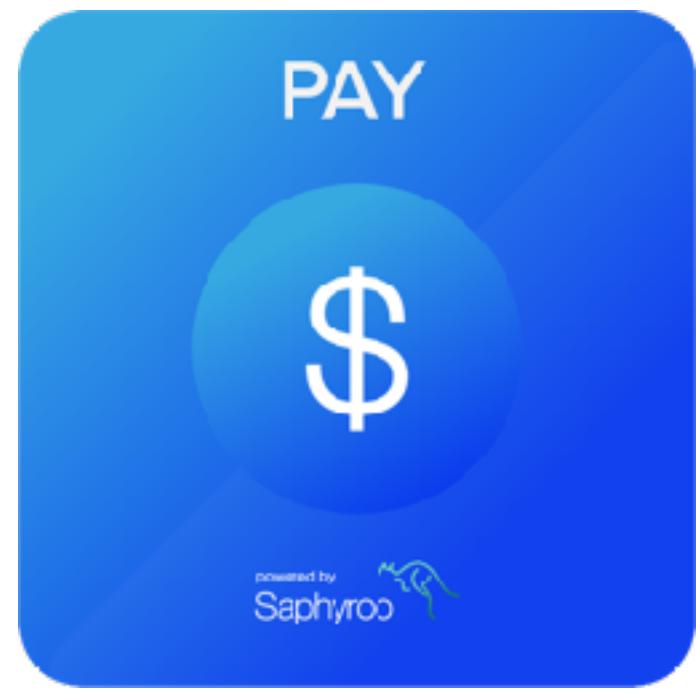

Configurable alert limits

Desktop, iOS and
Android.

saphyro.

Pay Features

Automated reconciliation
with Linfox weekly payments

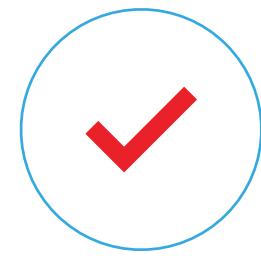

Can add comments against each
route with gaps.

Notification of summary
sent to CEO and Finance

History of all gaps by
week to track improvements

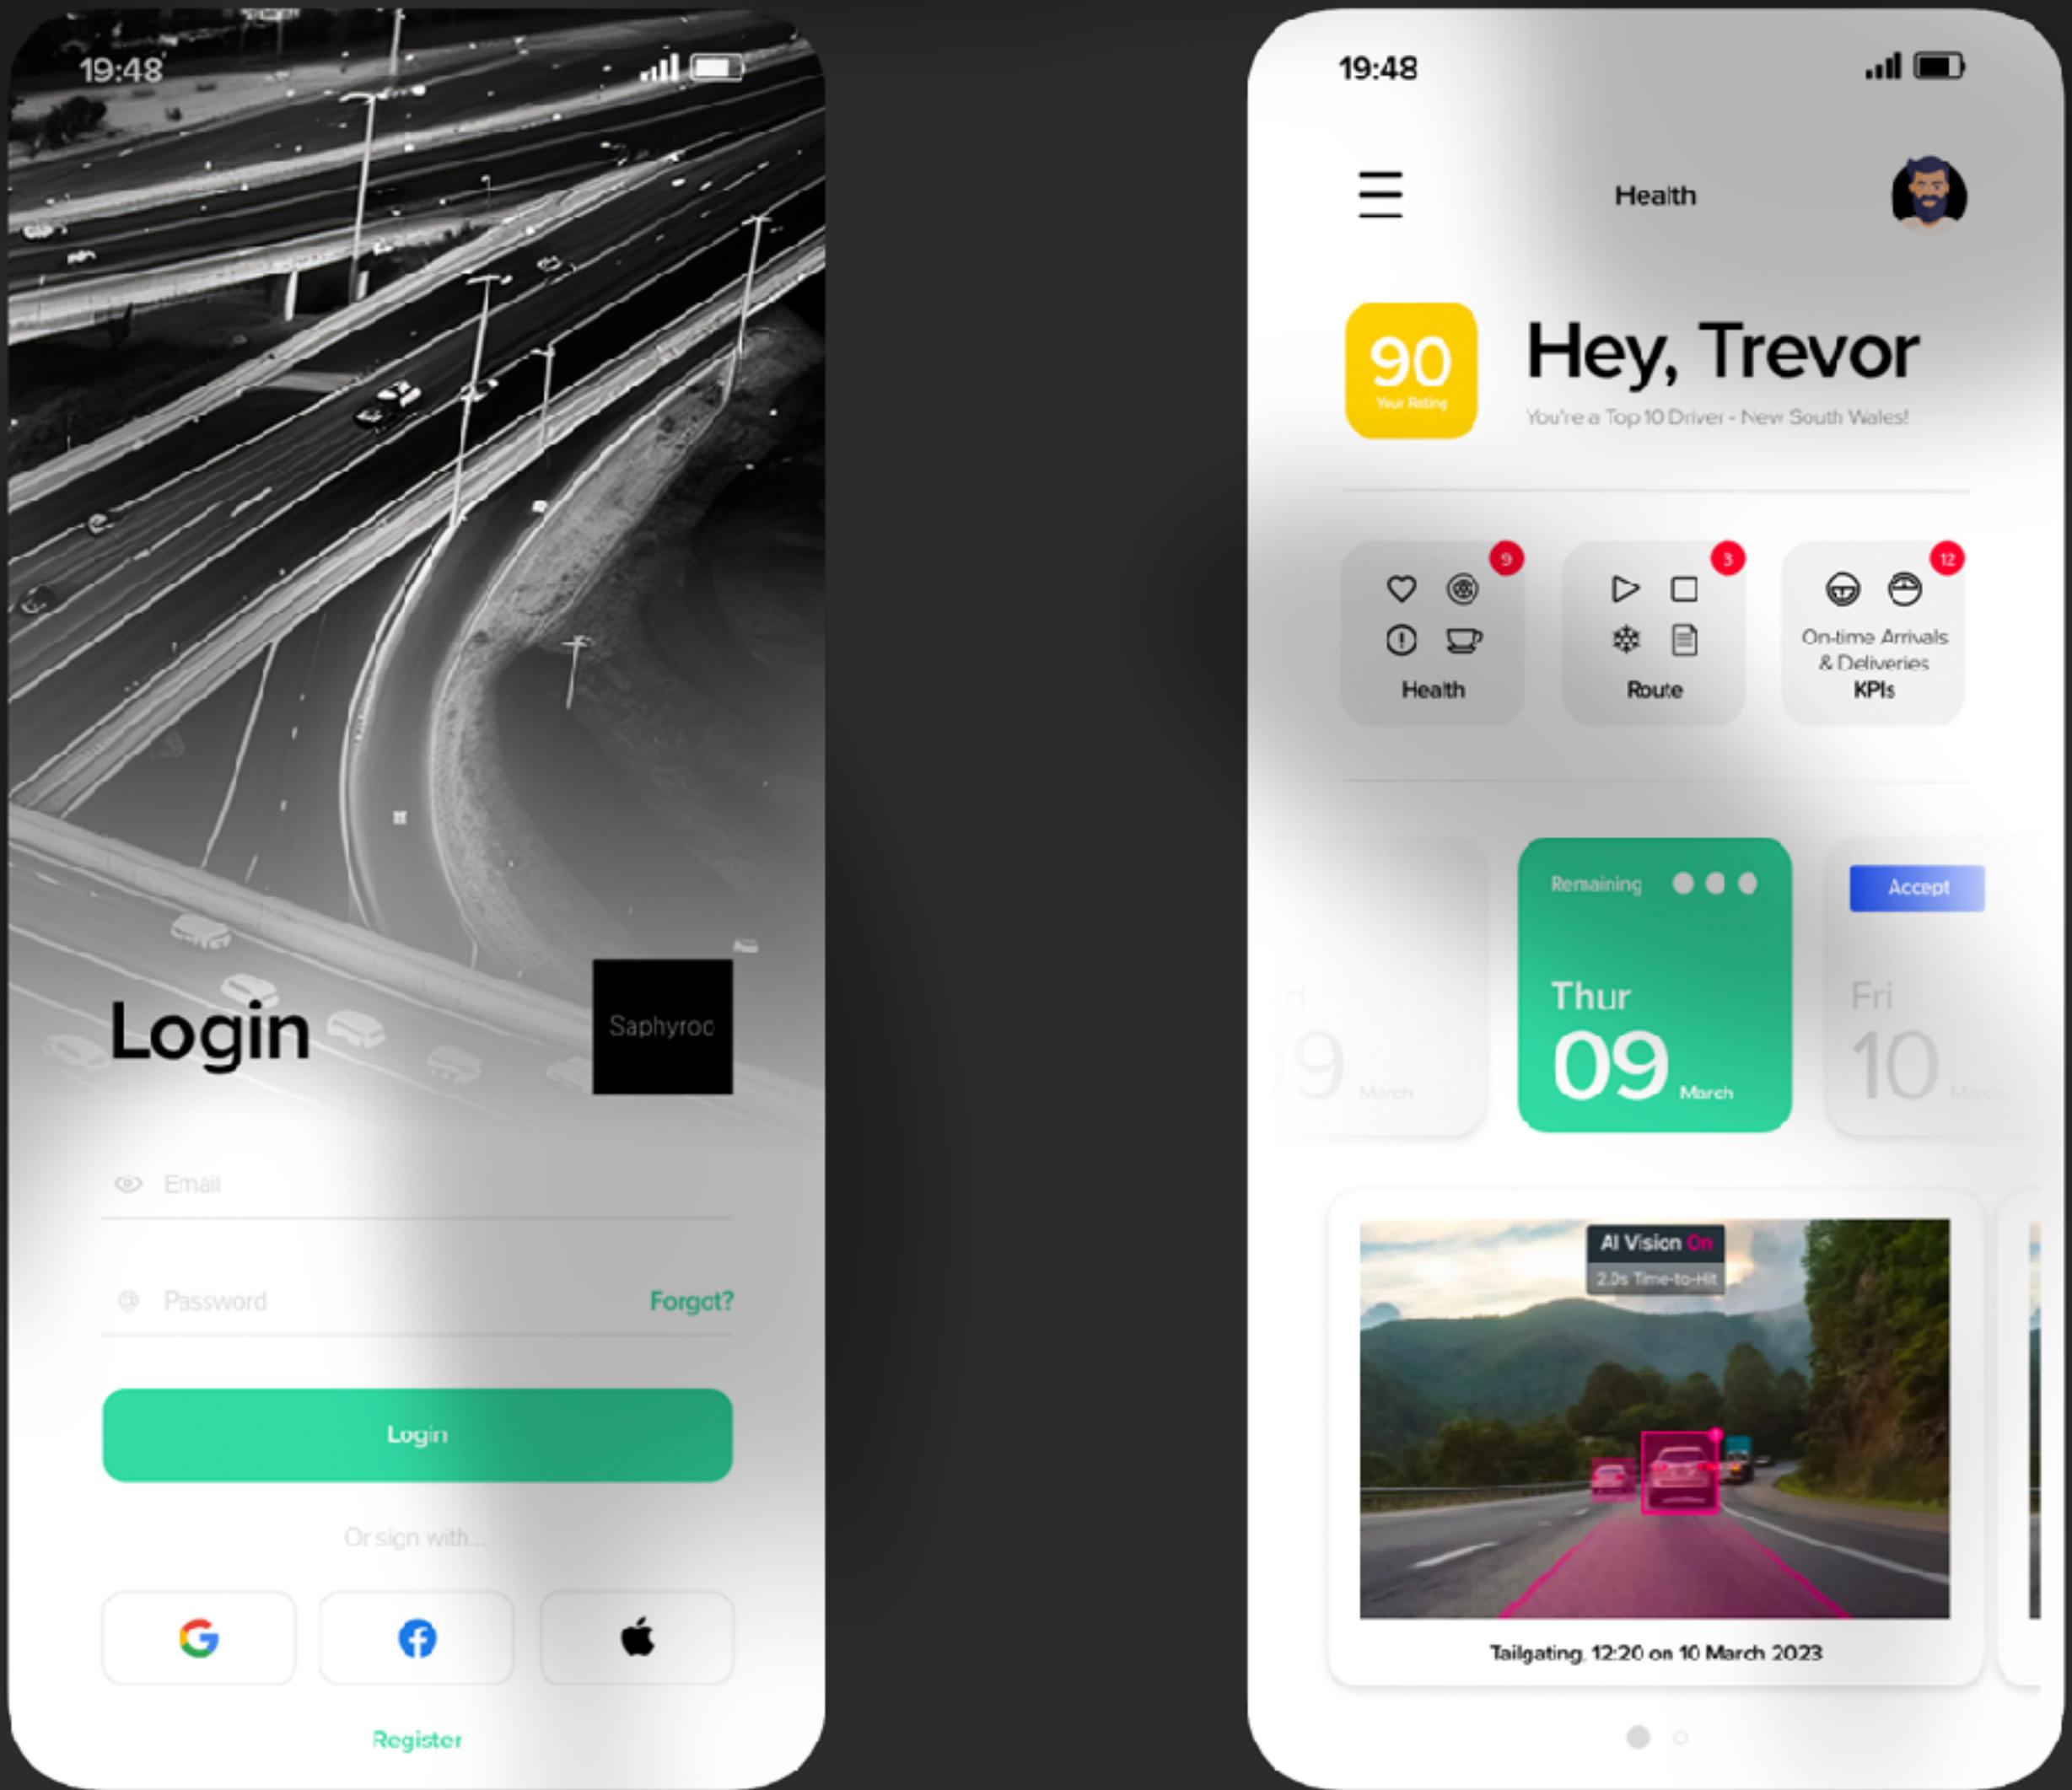

Dashboard categorises
gaps into 3 levels

C

New Features & UX

Driver safety monitoring

We used the data from engine, GPS, IMU, road facing and driver facing dash cams to deliver continuous monitoring and coaching on driver safety.

- Protects drivers, other road-users and reduces costs with AI-powered fleet safety solution.
- Prevents accidents and exonerates drivers with the most accurate, fastest AI dash cam. Reduces insurance costs by improving unsafe driving habits through automated coaching.
- Computer vision detects unsafe driving behaviour with high accuracy, and alerts drivers in real-time.

Cell Phone Usage Apr 11, 07:30 AM

Ben Tran Los Angeles, CA

Cell Phone Usage Hard Brake

Additional Context: Heavy Traffic Zone, Rainy Weather, Wet Roadway, Delayed Response

Results & Impact

Metric	Value
accident reduction	22%
safety violations reduction	56%
increase in exonerations with video data	72%
